## PROFESSIONAL SUMMARY

---

Web developer with hands-on experience building PHP-based WordPress sites using modern development workflows. Proficient in HTML, CSS, JavaScript, and SASS, with experience using Local for WordPress development and Codekit for build processes. Currently developing cross-platform applications with Flutter while building expertise in full-stack web technologies. Strong project management background with proven ability to collaborate across teams, document processes, and deliver quality results on deadline.

## TECHNICAL SKILLS

---

### Languages & Frameworks

PHP, HTML5, CSS3, JavaScript, SASS/SCSS, Python, Dart/Flutter

### WordPress & CMS

Custom theme development, Local by Flywheel, WP Engine, WordPress hosting environments

### Development Tools

Git/GitHub, Codekit (SASS compilation), VS Code, Chrome DevTools, Command Line/Bash

### Additional

Responsive design, Cross-browser testing, CRM platforms (GoHighLevel, Salesforce, HubSpot), API integrations

## DEVELOPMENT PROJECTS

---

### useful.io — Cross-Platform Utility Application

*Independent Development | 2024 – Present*

- Architecting and developing a comprehensive utility app using Flutter for iOS, Android, and web deployment
- Building 40+ mini-applications including calculators, converters, and productivity tools with consistent UI/UX
- Implementing responsive layouts across desktop, tablet, and mobile breakpoints
- Managing full project lifecycle from requirements gathering through deployment and monetization strategy

### WordPress Website Development

*Freelance Projects*

- Built PHP-based WordPress websites using Local development environment
- Configured SASS compilation workflows using Codekit for efficient CSS preprocessing
- Practiced deploying sites on WP Engine hosting platform
